

# SLIMDAG

SlimDAG is a passive transponder, tied up on the shoe. It has been specially designed for running races and used with mat antennas laid on the floor of the detection line.

The SlimDAG can be:

- disposable
- reusable

To customized your DAG, please give us a visual depends on following conditions:

- File format: Adobe Illustrator (.ai)
- Colors: 16bits minimum
- Minimum resolution: 300dpi

Be careful to include the two holes and round corners in your design.
